Setup for running CAST locally

CAST will be used locally during the course. This way you will have some of the latest updates. You must be logged on a Linux session on an ISAE-SUPAERO computer (not your personal laptop).

To launch CAST.

1. Log to a Linux session

2. Open a terminal (Applications → System Tools → Terminal)

3. Execute the four following commands in the terminal

   a. module load python/3.7
   b. source activate CAST
   c. cast run

4. CAST will open in Firefox tab
